

The Smart Rail EX

One Smart Concept

Built on the success of the standard Smart Rail, the Smart Rail EX takes spectator safety to a whole new level by ensuring your aisle rails are solidly in place and ready for use – that means no more storage! The EX model is designed for extended space seating projects, and with no tools to use or hardware to tighten, operational time is reduced to a mere two seconds.

*Safe and simple
- that's one smart concept!*

Features & Benefits:

- Ensures spectator safety as the rail is never removed
- Smart Rail concept now available for most projects
- Eliminates excessive setup and take-down time
- Eliminates removal and storage requirements
- Two second operation to rotate and store
- No tools required
- Available with all seating options
- In-line design, no staggering of rails
- Code compliant design

Technical Requirements:

- Available on 31" - 36" spacing
- Available on 10" - 16" row rise
- Minimum aisle width is 48" (Including end aisles)
